

# LYSEKILS HAMN AB

PORT OF LYSEKIL

# Lysport – a safe and ef

Lysport is constantly developing. We are a modern and flexible port with many competitive advantages.

## Strategic location

We have an excellent strategic location. Lysport is situated on the west coast of Sweden, between Oslo and Gothenburg.

## Short approach

Efficient transport is a key factor in our industry. The short approach from the North Sea provides great opportunities for saving both time and money.

## Our knowledge - your security

At Lysport, we are experts within our field. We are a small and flexible port with extensive experience in qualified handling of goods. We are able to accommodate vessels of up to approximately 50,000 DWT.

The catchment area for Lysport extends throughout Sweden and parts of Norway. We have traffic to Norway, countries in Western Europe, the Mediterranean and North Africa.

## Dedicated staff

Lysport has an efficient organization with a personal treatment to every customer. Our employees are very committed and highly able to adapt, which makes us very responsive to the wishes of our customers. We always do our utmost to provide the best service.

**En partner – många tjänster**  
Säkrare, enklare och lönsammare

Vi vet vilka problem och specifika behov du möter. Våra tjänster är kraftfulla verktyg som är avgörande för din säkerhet, tillgänglighet och kunskap.

Vi har bred erfarenhet av:

- Besiktning
- Provnig
- Teknisk konsultation
- Certifiering
- El
- Brand
- Utbildning
- Riskbedömning

# efficient port

# A high-class logistics centre

Lysport offers great logistical solutions. For storage of goods, such as construction materials, tiles and wood pulp, we have 25,000 m<sup>2</sup> in warehouses. We have one temperature-regulated warehouse, which allows us to store goods that are sensitive to changes in temperature. The warehouses has been expanded on an ongoing basis, and should the demand for space increase, there is capacity to expand this area further.

## The quay and warehouse are in close proximity

In our port, the distance between quay and warehouse is short, allowing rapid management and high productivity. It also means that cargo operation will be less susceptible to poor weather. There is plenty of space for trucks, forklifts and cranes. Loading and offloading is handled by Lysports own staff. Quality and safety are keys in these areas. The quality policy that we express is to get it right from the start, and to keep our promises.

## Combines shipping, intermediary storage, and onward transportation

Lysport is the perfect place to begin for companies looking for cost-effective logistic solutions. Short approaches, railway tracks to all quays, and a distance of only 30 km to the interstate highway E6, makes our conditions unique. With warehouses inside the port, our customers also avoid the expense of intermediary storage.

# An exotic cruise destination

An increasing number of cruise lines are showing an interest in Lysport. This is easy to understand, as we offer an unique destination. We are as close to the town of Lysekil as we are to the stunning surroundings of the Bohuslän area!

Go for a bicycle ride and end the day with a culinary treat at a fish restaurant in the picturesque Old Town of Lysekil. Visit the fishing community of Grundsund or walk barefoot on the warm rocks. Take the boat to Fiskebäckskil, look at the 3000 year old rock carvings in Brastad, or go on a seal safari. There is one thing that we can promise our cruise guests: they will bring home a life-long memory!

Global thinking, global transport  
**Together we create connection.**

## Experts in project cargoes

The port has five cranes with a capacity of up to 80 tonnes. At our disposal, we also have more than 20 forklifts, as well as terminal tractors and other specialised equipment. These resources, combined with our staff's knowledge and commitment, allow us to manage all types of project cargoes. This task includes a lot of planning, in which high demands will be placed on our organisational abilities. With our extensive experience, we are a reliable partner to hire.

## Logistic solutions within wave power

Seabased AB is constructing Sweden's first commercial wave power plant, situated in the sea, to the northwest of Kungshamn. The wave power plant is being constructed in Lysekil and then transported by supply vessels. We are assisting Seabased with logistical solutions, from factory to launch. A project of this kind requires special resources, both in terms of machinery and expertise. Therefore, we are proud to have been chosen by Seabased.

## Bulk management and sawn timber

Lysport has the capacity to manage 750,000 tonnes of cargo per year. Our aim is a quick and smooth cargo operation.

Bulk goods are dominated by imports of chalk and talc, which are offloaded directly to the manufacturing plant located in the port. The chalk and talc is used to produce slurry, which is sold to various companies within the paper industry.

Sawn timber comes from a number of various sawmills in Sweden and Norway. The products are then sent on to customers in France, Spain and North Africa. We are well-equipped in this area as we have, for example, self-unloaders and knuckle-boom cranes, for efficient handling.
